

# Geoscape Data Evaluation Program for Government

Get up to 6 months free data access | Exclusive government pricing

Apply now

## Geoscape Australia delivers the power of location

We take the guesswork out of location data, enabling a better sense of the world around us.

The capacity to develop place-based policy is an essential tool for government departments and agencies to deliver better outcomes for Australians. When it comes to using location data for new projects, building proof of concepts, design modelling, digital twins, decision making, planning and more, we know you need the best data sources. The time and resources spent on acquiring high-quality data can be critical to a project's success.

To maximise data-driven innovation across the economy and ensure that location data adds value and helps with government initiatives across community engagement, policymaking, service delivery, digital transformation and more, you can rely on Geoscape's Data Evaluation Program for Government.

This program is a unique and rare opportunity that helps you experience and evaluate our location data for free.

## Program highlights

- Available for Commonwealth, state and territory government departments and agencies.
- Helps you experience our location dataset(s) without any charge for up to 6-months via our self-serve portal.
- Allows access to our exclusive government pricing.
- Bundled discounts if you license multiple datasets.
- Pricing discounts grow as more departments and agencies in your government license our data.
- Receive Program material, including webinars and data guides.
- Work with our network of data partners to assess any special implementation needs.
- Access the team of geospatial experts.

Experience the power of location data with Geoscape's reliable, affordable, and accessible data products.

# Benefits of Geoscape Data Evaluation Program for Government

## 1. Build a proof of concept with free high-quality datasets

Are you looking to build a proof-of-concept or test your processes and systems using high-quality location data but want to keep your cost down? You can take advantage of our program and get high-quality location data for free.

Geoscape is behind G-NAF (the Geocoded National Address File). Like G-NAF, all our other data products, including Buildings, Transport, Trees, Transport, Roads, Cadastre, Planning, Property and more, deliver the high quality you would need for your project. Many government agencies already rely on us to access accurate, up-to-date data.

## 2. No obligation, low-risk entry to evaluate and plan

Not sure that your current arrangement offers the best of everything you need for delivering your project, this program is your chance to evaluate and plan your use of Geoscape's products without any charge or financial commitments.

## 3. Access our Partner network

Geoscape Partners use our data to provide value-added solutions and services to their customers. You can experience our data products and work with our network of data partners to access any special implementation needs.

## 4. Access our self-serve platform and team of experts

The program aims to ensure you evaluate Geoscape's data products effectively and derive maximum value during your free access period.

Once onboard, you can access our data via our self-serve platform. The program also allows you access to program material, including webinars and data guides. Most importantly, our team of geospatial experts will work closely with you to answer all your questions.

## 5. Exclusive government pricing, bundled discount

We've created special pricing for Commonwealth and state and territory government departments and agencies that you can access for contracts entered beyond the 6 months free data access period.

The program gives you access to our custom bundle discount based on the number of datasets bought.

The more Commonwealth and state and territory government agencies using Geoscape data, the more discount you can get.

The program provides better value to departments and agencies of different sizes.

## Geoscape data is **unique**. We're committed to exploring and **mapping the nation**.

Geoscape spatial data delivers a clear picture of our complex cities, regional centres and rural communities as they change. It represents the buildings, land, transport networks and more across Australia's 7.6 million square kilometres.

- 15 million buildings
- 15 million addresses
- 15 million land parcels
- 1 million swimming pools
- 1.1 million solar panel installations
- 2.7 million kilometres of roads
- Land & tree cover across Australia and more.
